

UBio Alpeta

UBio Alpeta is a powerful, scalable Access Management Software integrated with Meal Management and Visitor Management System, designed for enterprise-grade security and centralized control. The platform supports Upto 500,000 users and terminals, providing real-time monitoring, advanced access rules, and seamless third-party integrations.

Key Features:

- Auto-detection of terminals with common configuration settings
- Wiegand IN & OUT interface protocol support
- Siren/Bell scheduling for shift start & end indication
- Integration with Fire & Emergency Evacuation Systems
- Alarm configuration with automated email notifications
- Message broadcast (global & individual user messages)
- Global Anti-Passback
- Custom image and voice upload on terminals
- Server-based Intercom configuration

User & Credential Management:

- Centralized user registration with photo and personal details
- User validity and expiry management
- Enrollment of Face, Fingerprint, Card, Password & Mobile Key
- Store fingerprint template on smart card
- Duress fingerprint registration support
- Flexible admin authority and role-based access control

Access Rules & Scheduling:

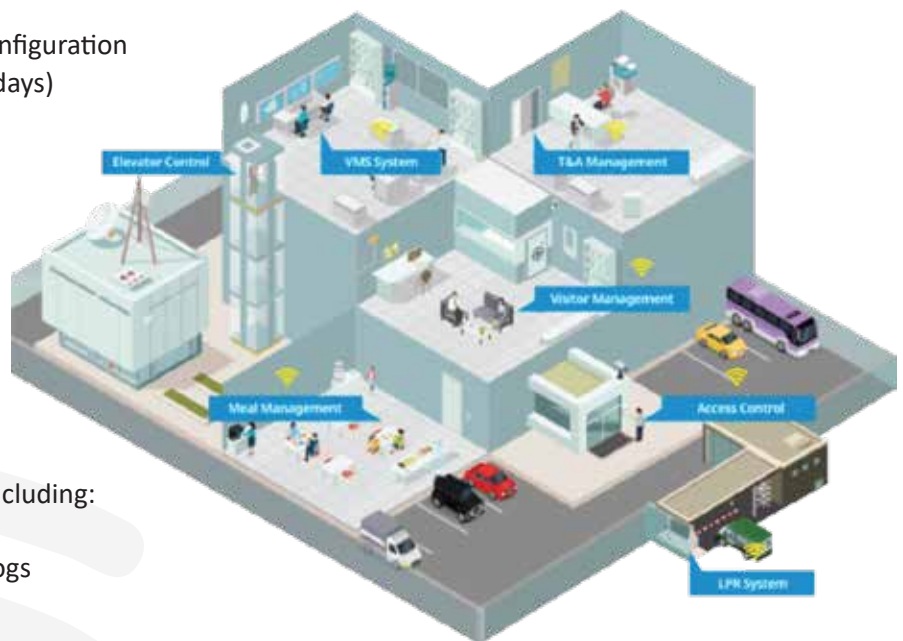

- Supports up to 9,999 Time Zones
- Up to 12 transaction bands per day
- Access Areas and Access Groups configuration
- Global Holiday setup (up to 32 holidays)

Authentication Modes:

- Server → Terminal
- Terminal → Server
- Server Only
- Terminal Only

Log & Report Management:

- Comprehensive log management including:
 - Access logs
 - Server, terminal, and admin audit logs
 - Event and transaction search
 - Flexible report filters
 - Export reports in CSV format
 - User-wise and terminal-wise reports

Licensing:

Items	Lite (Free)	Standard	Premium	Enterprise
